

Where Do Bees Live?

Color the adventure. Read Star's story.

Then go outside and investigate!

☆ STAR is a ☆
Guardian of Gathered Sunshine.

Bees still live in hollow trees today.
That's where it's dark and dry,
and the temperature stays just right.

But there aren't as many hollow
trees as there used to be.

So when bees choose someplace
they can't stay,
we give them a safe home.

**All our Sassy Bees
are rescues.** ♥

You can help bees, too, by
planting flowers and taking care
of the wild places around us.

THINK ABOUT IT

If you were a Scout bee
shopping for a new home,
what things would
you look for?

Every Star

☆ has a story. ☆

Follow the QR code
to see what Star and
the bees discovered!
